Waterproof Marine Audio Systems

NEW PRODUCT!

The *MZ-100 Marine Amp* is a versatile audio control system designed specifically for marine applications. It contains a powerful Digital Signal Processor (DSP) continually monitors the output signal eliminating distortion and

maximizing output power for crisp clear audio reproduction. Combined with the Poly-Planar MRD-70 series/RD44 remote display audio controller, the MZ-100 allows for multiple zones, (different cabins, fly bridge, cockpit, saloon) with independent volume and source control, intercom, and local auxiliary input.

The Waterproof Marine Audio System with the Concert Hall Sound™
